Syllabus   Concepts

Photoshop | Basic HTML | CSS | HTML5 | CSS3 | JQUERY | BOOTSTRAP | Adobe Illustrator CC | Corel Draw

HTML

Our Web development course begins with the Hyper Text Mark Up Language. This is a basic markup language which is used for creating web pages which are viewed in a web browser. They could also include Text, links, images and even sound and video. So you would know in details everything about HTML and how it is used for creating web pages.

CSS

CSS as you already might know is web development language that is used for describing the presentation of Web pages. These include descriptions of colours, layouts and fonts. One of the great advantages of learning CSS as a web Development Language is that it would allow you as a web developer your presentation to different types of devices like large screens, small screens and so on. This is therefore a very important aspect in the current web Scenario. CSS is independent of HTML and can be used with any XML based markup language.

Java Script

As a Web developer it is important that you have some good knowledge of Java Script too. It is am easy to use programming language which can be embedded in the header and footer of various web pages and can enhance the dynamics and interactive features of the web pages.

AJAX

Ajax is a set of Web Development techniques which is used to create various types of web applications. AT PHP Kolkata you would also be trained on Ajax also.

Jquery

At PHP Kolkata you would also be given a clear idea about Jquery too, which would help you in your overall Web Development career.

PHP My SQL

At PHP Kolkata you would also get a clear understanding about PHP MY SQL web applications which would again go a long way to help you in your web development career.

Laravel

Through our Website development course you would also get to know about Laravel which is one of the most abundantly used PHP frameworks.
